

## Combination Exercise - Push-up - Superman - Group: Combination exercise

### Tags

**Type of exercise:** Combination exercise, Partial body exercise, Strength exercise

**Number of persons:** One

**Muscle Primary:** Abdominis, Chest, Arm, Shoulder

**Muscle Secondary:** Butt, Leg, Back

**Difficulty:** Medium

**Other:** Dynamic, Knee height, Hip height, 1 Sling

### Description

1. The arms are bent up to 90 ° in the elbow. The body is stretched under tension. 2. The arms are stretched again and the chest is pushed up as far as possible. 3. From the push-up position, the upper body begins to move forward with stretched arms. In the final position the body is stretched as far as possible. 4. The upper body moves back to the push-up position.

### Advice

Bend and stretch only the arms while the body remains in a fixed position! The greater the distance from the suspension point, the greater the tensile load on the abdominal muscles. Avoid a drop in the hip during the movement!
