

Combination Exercise - Push-up - Crunch Pelendum - Group: Combination exercise

Tags

Type of exercise: Combination exercise, Partial body exercise, Strength exercise

Number of persons: One

Muscle Primary: Abdominis, Chest, Arm, Shoulder, Leg

Muscle Secondary: Butt, Back

Difficulty: Medium

Other: Dynamic, Knee height, 1 Sling

Description

1. The arms are bent up to 90° in the elbow. The body is stretched under tension. 2. The arms are stretched again and the chest is pushed up as far as possible. 3. From the push-up position, the body is pushed up. The knees are alternately tightened to the left and right beside the chest. 4. The knees and hips are stretched again.

Advice

Bend and stretch only the arms while the body remains in a fixed position! The greater the distance from the suspension point, the greater the tensile load on the abdominal muscles. Keep your legs closed during the exercise! Avoid a "hollow back" when stretching the body! The practice becomes more intense the further you remove your body from the suspension point.
